Swimming pool Heating and Dehumidification

VALID FROM: FEBRUARY 6, 2019

 **MICROWELL**

European manufacturer
of swimming pool dehumidifiers and heat pumps

INTERNATIONAL SALES NETWORK

From its foundation in 1992, MICROWELL Ltd. is firmly present on the global market, with 750 distributors and partners in 30+ countries across Europe, Russia, Middle East and North Africa.

All products are proudly developed and manufactured in Slovakia.

Slovakia is European Union, Schengen area and Eurozone member.

MICROWELL Headquarters

Microwell operates in 3 business divisions /Dehumidification and Heating Solutions, Measurement and Control, Air conditioning and Ventilation/, employs 60 employees in 6 Branch offices in 3 countries: Slovakia, Czech republic, Hungary/. The company has own manufacturing facilities, warehouse, R&D department.

The core strength of Dehumidification and Heating Solutions Division is its **R&D team**, that works hard to find new solutions or innovations in **Inverter control system technology** as well as in **WIFI regulation** of Microwell products. They developed the second generation of DRY SIREN, with advanced functionalities. Furthermore, there was a **new, more ecological refrigerant "R32"** used in the heat pump production.

Production & warehouse

Primary manufacturing facility located in 3.000m² venue. Office extends over 1.260m².

R32 REFRIGERANT

Highly efficient ecological refrigerant

Reducing Global Warming & Ozone Layer Depletion by HP production

The quantity of R32 refrigerant used is significantly lower as compared to the R410A refrigerant. Consequently, this results in decreasing the potential of global warming and minimal depletion of the ozone layer. That's why Microwell developed the new generation of swimming pool heat pumps, working on the principles of R32 refrigerant with higher capacity.

IMPROVED ENERGY EFFICIENCY

HP Inverter technology

Inverter technology enables powerful yet quiet performance of Microwell heat pumps, while minimising the energy consumption. New Microwell models come exclusively with R32 gas in 2019.

Wi-Fi REGULATION

Mobile app for DRY SIREN and HP

Control your machine by using Android or iOS based smartphones. This advanced technology provides you many benefits, it allows a user to reach their Microwell equipment anytime, from any place of the Earth. You only need to download the 'Smart HP' app for heat pumps or 'DRY Siren' app from the Google Downloads or the Appstore.

WINTER MODULE

New Auto ICE screening function prevents Microwell heat pumps from any damage during extremely cold weather. when a substantial ice built-up occurs, the heat pump switches itself automatically in super defreeze cycle that melts the ice away. Winter module helps to extend operational air temperature range down to -15°C.

SWIMMING POOL DEHUMIDIFIERS

NEW

SAVING ENERGY, TIME & MONEY

ADDITIONAL VENTILATION

Bring fresh air into your pool and warm it with the dehumidifier

Our Innovation: **FRESH AIR SUPPLY**

Each Microwell dehumidifier has fresh air supply possibility. The air inlet is located under the condenser, that way the incoming fresh air is effectively heated at no cost thanks to heat recovery.

Fresh air metal extension for connection to dehumidifier

Plastic circular hose

Plastic external louver

Compatibility to All DRY range.

10. WATER SURFACE COVER

A swimming pool cover reduces the actual evaporation by 30-50%. This means that you need a smaller dehumidifier for a given pool, you will save on energy bill since smaller unit consumes less electricity and also you will reduce heat losses of your water, thus you will need smaller heating device (heat pump) and also it will consume less energy compared to pool without cover.

Blue bubble plastic cover is a perfect solution for a domestic or hotel pool.
